UCEAP Transcript Title ECOLOGICAL INNOVATN
UCEAP Quarter Units 5.00
UCEAP Semester Units 3.30

Course Description

This course covers the concepts, theories, and techniques of ecological innovation: Innovation within the context of the environment in which we live and are interconnected. The course is both theoretical and practical. It begins with a study of innovation. The idea of ecological innovation is explored and critiqued. Systems innovation is addressed as a core innovation process for ecological innovation, but other methods of innovation are also relevant. The latter part of the course is a group project applying an innovation methodology in a business context.
