EARTH SURFACE ENVIRONMENTS

**UCEAP Transcript Title**

EARTH SURFACE ENVIR

**UCEAP Quarter Units**

6.00

**UCEAP Semester Units**

4.00

## Course Description

This course discusses the basic concepts and principles that underpin geomorphic landforms and processes operating at the Earth's surface in a great variety of landscapes around the globe. It presents the significance of time and space scales for recognizing process-form linkages in different environments and the interactions between fluids and sediment transport that result in the formation and development of a variety of landforms.

## Language(s) of Instruction

English

## Host Institution Course Number

5SSG2023

## Host Institution Course Title

EARTH SURFACE ENVIRONMENTS

## Host Institution Campus

King's College London

## Host Institution Faculty

## Host Institution Degree

## Host Institution Department
