# **COURSE DETAIL**

### **PALEOMINOLOGY**

## **Country**

Iceland

#### **Host Institution**

University of Iceland

### Program(s)

University of Iceland

#### **UCEAP Course Level**

**Upper Division** 

### **UCEAP Subject Area(s)**

Geography Earth & Space Sciences

### **UCEAP Course Number**

124

#### **UCEAP Course Suffix**

#### **UCEAP Official Title**

**PALEOMINOLOGY** 

## **UCEAP Transcript Title**

**PALEOMINOLOGY** 

## **UCEAP Quarter Units**

6.00

#### **UCEAP Semester Units**

4.00

### **Course Description**

The course provides an introduction to the study of lake sediments, commonly used methods, and inferences derived from lake-sediment analyses. Characteristics of lake sediments, abiotic and biotic components of lake sediments, and the response of lake systems to environmental and climate change are discussed. Practical analyses include initial lake-sediment description, smear-slide analysis, common sample-treatment methods, and the separation, documentation, and identification of macroand microscopic organic remains. Paleoecological and paleoenvironmental reconstructions based on lake sediments are demonstrated.

### Language(s) of Instruction

English
