Course Description

The course deliver the most important issues on mergers, acquisitions, and corporate restructuring such as corporate divestitures. In particular, the course develops students' ability to critically understand and evaluate issues such as: regulatory and strategic considerations, takeover tactics, and takeover defenses; target firm and foreign target firm valuation; issues developed through information economics that contribute on the negotiation and re-negotiation stage of corporate reforms; empirical tests on the performance of merging and divesting firms at both the announcement- and the post-merger or integration period; and cross-border (cross-industry) acquisitions and their main differences with domestic (focused) ones.
