UCEAP Quarter Units 6.00
UCEAP Semester Units 4.00

Course Description

This course examines the processes, methods, techniques and tools that organizations use to determine how they should conduct their business, with a particular focus on how web-based technologies can most effectively contribute to the way business is organized. It covers a systematic methodology for analyzing a business problem or opportunity, determining what role, if any, web-based technologies can play in addressing the business need, articulating business requirements for the technology solution, specifying alternative approaches to acquiring the technology capabilities needed to address the business requirements, and specifying the requirements for the information systems solution in particular, in-house development, development from third-party providers, or purchased commercial-off-the-shelf (COTS) packages.
