4.50

UCEAP Semester Units
3.00

Course Description

This course offers students the methodological foundations to undertake research related to the study of political elites or any other relevant group using secondary data. The course also allows the student to get acquainted with the production of primary data. The approach is multimethodological, and it focuses on the study of political elites. All the sessions include a lecture, but they can also include practical sessions using computers. The first part of the course is devoted to qualitative methodologies, while the remaining part deals with more quantitative approaches to research in political science. The sessions are designed for students who have no prior knowledge and/or background in data analysis or research methods.
