Course Description

The Finance function is a critical aspect of any organization. The success or failure of a firm may be influenced significantly by how it manages its finances. It is therefore important for both managers and employees to understand the principals of financial management for firms operating in any industry. This course is designed to provide a comprehensive understanding of financial management. It focuses on analyzing and evaluating financial products using various techniques. It covers several topics related to financial management such as debt policy, dividend policy, maximizing corporate value and financial risk. Throughout this course, students will become familiar with the basic concepts of corporate finance and financial language used within academic literature and the media.
