Course Description

This course explores key contemporary complexities and future urban issues faced by evolving cities. By drawing on the expertise of leading urban professionals, academics, and researchers, students learn to critically analyze and discuss specific topics relating to current urban issues, debates, and technologies. Each run of the course focuses on a topical study or thematic analysis of specific urban issues to provide greater insights and highlight current cutting-edge research and technologies in the field. Students learn, interact, and collaborate with these leading professionals to stay abreast of the latest trends, practices, and challenges to remain informed and adaptable in the ever-changing environment of cities.
