MARINE MAMMAL BIOLOGY AND RESEARCH

**UCEAP Transcript Title**

MARINE MAMMAL BIOL

**UCEAP Quarter Units**

6.00

**UCEAP Semester Units**

4.00

## Course Description

This course provides a broad introduction to marine mammal biology and research, including topics such as origin, evolution, taxonomy, distribution, abundance, anatomy, sensory biology, ecology, and behavior. Further, the course addresses impacts caused by pathogens, human activities, and climate change, as well as marine mammal management and conservation. Each topic is covered at a general introductory level, and selected topics are additionally presented and discussed by guest lectures with expertise in marine mammal research, conservation, and management. The course provides an overview of marine mammal biology and research practices, forming a solid basis upon which to build future study, research, and career interests in marine mammal biology and wildlife biology in general.

### Language(s) of Instruction

English

### Host Institution Course Number

SGBB20003U

### Host Institution Course Title

MARINE MAMMAL BIOLOGY AND RESEARCH

### Host Institution Campus

### Host Institution Faculty

Health and Medical Sciences

### Host Institution Degree

Bachelor
