6.00

UCEAP Semester Units

4.00

Course Description

Examining flows of diseases, people, goods, knowledge, and technology induced by processes of globalization can deepen our understanding of the complexity of health and disease. In this course, these flows are studied in depth, bringing insights into (epi) genetic disease distributions as well as the spread of information, technology, and migration, all in themselves affecting health and disease. The content of this course draws on several distinct academic disciplines of political economy, anthropology, biomedicine, (epi) genetics, and epidemiology. Prerequisites include Introduction to Biology and at least one of the following courses: Genetics and evolution, Infectious diseases and Global public Health, or Globalization and Inequality.

Language(s) of Instruction

English
