Course Description

Ancient Greek is the original language of ancient Greek historians, writers, and philosophers such as Herodotus, Sophocles, Plato, and Aristotle, as well as the language of the New Testament. This course studies the basics of ancient Greek.

To understand Greek thought and Christianity, the two roots of Western culture, it is essential to read the ancient Greek classics and the New Testament. Understanding a language cannot be separated from understanding the social context in which it is used. This course then studies ancient Greek while studying the basic framework of ancient Greek politics, economics, and philosophical thought.

As many vocabulary words in modern Western languages are derived from Greek, understanding Greek language equates to understanding modern Western languages, including English.
