2.00

Course Description

This course introduces production management and presents tools and techniques mostly used by Japanese companies to manage and control their production systems. It provides the necessary concepts, tools, and methods to understand production management systems and the logic behind the various planning, scheduling, control, and decision techniques. The course covers essential Japanese production management concepts such as Toyota’s production systems, just-in-time, Kanban, and Kaizen. It also deals with traditional and modern Japanese production systems and those control systems being practiced in Toyota.
