UCEAP Semester Units

2.70

Course Description

This course gives an introduction to methods of pharmaceutical analysis, which utilizes chromatographic, spectroscopic, and electroanalytical techniques to determine the structure and purity of medicinal compounds. Topics include analytical methods for characterizing pharmaceutical solids, AA Spectroscopy in pharmaceutical analysis, extraction of organic and inorganic analytes from aqueous solution, spectroscopic techniques, and complementary techniques to determine the structure and purity of a pharmaceutical compound.

Language(s) of Instruction

English
