Course Description

This course introduces the fundamentals of tropical horticulture, with emphasis on the situation in Singapore, a tropical garden city. Topics include plant growth and development and factors affecting them; pests and diseases and their control; growing media; plant nutrition; tropical urban horticulture of ornamentals; vegetable and fruit crops, and native plants; vertical and roof gardening; turf grass management; landscape design; organic methods and impact of horticulture on conservation. Field trips, demonstrations, and projects enable students to enjoy hands-on experience in cultivating plants.
