COURSE DETAIL

IMMUNOLOGY OF HUMAN DISEASES
Country United Kingdom - England
Host Institution King's College London
Program(s) King's College London
UCEAP Course Level Upper Division
UCEAP Subject Area(s) Biological Sciences
UCEAP Course Number 179
UCEAP Course Suffix
UCEAP Official Title IMMUNOLOGY OF HUMAN DISEASES
UCEAP Transcript Title IMMUNOLOGY/DISEASES
UCEAP Quarter Units 6.00
UCEAP Semester Units 4.00

Course Description

This course gives students an understanding of the intricate relationship between human health and the immune system. It provides students with tools to critically review and understand the current knowledge (sometimes contradictory) behind what we know about the origin of the disease, its clinical phenotype, and its treatment. In order to do so, an expert in the field is invited to lecture each week on a specific disease/condition, ranging from autoimmune disorders and viral infections to cancer and aging. Students also gain an understanding of how the immune system's power can be harnessed for new therapeutic avenues that are currently explored.

Language(s) of Instruction
English

Host Institution Course Number
6BBBI308

Host Institution Course Title
IMMUNOLOGY OF HUMAN DISEASES
