**UCEAP Quarter Units**

6.00

**UCEAP Semester Units**

4.00

## Course Description

This course is concerned primarily with computer graphics systems and in particular 3D computer graphics. It includes revision of fundamental raster algorithms such as polygon filling, and quickly moves onto the specification, modelling, and rendering of 3D scenes. The following topics may be covered: viewing in 2D, data structures for the representation of 3D polyhedra, viewing in 3D, visibility and hidden surface algorithms, illumination computations. Some attention will be paid to human perception of color and interactive 3D such as virtual reality.

## Language(s) of Instruction

English

## Host Institution Course Number

ECS610U

## Host Institution Course Title

COMPUTER GRAPHICS

## Host Institution Campus

Queen Mary University of London

## Host Institution Faculty

## Host Institution Degree

## Host Institution Department

School of Electronic Engineering and Computer Science
