Course Description

This course introduces theory and research in cognitive psychology, the study of the human mind and mental processes. Key theories and research in cognitive psychology are discussed, including visual and multi-modal perception, attention, memory, language, reasoning, and decision-making. Experiments and studies from classical and modern cognitive psychology are provided and discussed critically throughout to illustrate these concepts. This course demonstrates the essential role of that cognitive psychology plays in everyday life.

Language(s) of Instruction
English
