EXPERIMENTAL ECONOMICS: MARKETS, GAMES AND STRATEGIC BEHAVIOR

UCEAP Transcript Title
EXPERIMENTAL ECON

UCEAP Quarter Units
6.00

UCEAP Semester Units

4.00

Course Description

The course introduces students to the idea that economics, like all of the natural sciences, can be a laboratory science. Students study the role laboratory experiments can play in testing economic theories, as well as suggesting new ones. This is achieved through a series of topics in experimental economics, including market experiments, individual decision making experiments, and game theory experiments.

Language(s) of Instruction
English

Host Institution Course Number
L1097
