Course Description

This course introduces students to (1) the main disciplines which shape education, including sociology, philosophy, economics, history, and psychology, and the accounts they give of the relationships between education and social change; (2) the structures of formal education in the UK and the different conceptions of the value and purposes of education they represent; (3) how key stakeholders, such as policymakers, professional associations, teacher unions and employer bodies, have influenced the ways in which education is organized, for example, by raising the school leaving age, the introduction of a National Curriculum, or Academies; (4) the potential of education to create a more just and socially cohesive society, and what structural, organizational, and individual barriers help or hinder the realization of this vision; and (5) the role of educational theory and research in identifying and analyzing critical educational changes, using concepts such as, marketization, widening participation, social justice, and social inclusion.
