RECNSTRCTN ARCH URB

UCEAP Quarter Units

4.50

UCEAP Semester Units

3.00

Course Description

The focus of the seminar is the concept of reconstruction in the field of architecture and urban development, an essential term when dealing with loss and destruction in historical urban structures. In addition to the decision or debate between monument preservation and new planning, the course also discusses the crucial role of political, social and identity authorities in these design processes. By reading theoretical and official texts, analyzing international case studies and visiting Berlin case studies, students gain insights into the diversity of theories and methodological approaches to reconstruction in modern and contemporary architectural practice and monument preservation.
