COURSE DETAIL

ENVIRONMENTAL CHANGE AND DISEASE
Country United Kingdom - England
Host Institution University College London
Program(s) University College London
UCEAP Course Level Upper Division
UCEAP Subject Area(s) Health Sciences Environmental Studies
UCEAP Course Number 134
UCEAP Course Suffix
UCEAP Official Title ENVIRONMENTAL CHANGE AND DISEASE
UCEAP Transcript Title ENV CHANGE&DISEASE
UCEAP Quarter Units 6.00
UCEAP Semester Units 4.00

Course Description

This course explores the interdependencies between natural systems and human disease in a time of rapid environmental change. Acknowledging diverse and changing perspectives on health and the environment across history and cultures, students are introduced to emerging concepts and issues in this field, fundamental approaches to assess evidence for causal relationships between environment and disease as well as begin to develop an understanding of the complex socioecological systems within which remedial action can be taken.
