Course Description

This course discusses the main neuropsychological syndromes and the neuropsychological profile of the main neurological and psychiatric diseases. The course explores topics including an introduction to clinical neuropsychology and neuropsychological assessment; neurology and neuroradiology for neuropsychologists; cognitive deficits and neuropsychological syndromes in neurological disorders; neurodegenerative diseases, dementia, and its risk and protective factors; and neuropsychological profile in psychiatric disorders. The course requires students to have a basic understanding of concepts from psychobiology, cognitive psychology, and cognitive neuropsychology as a prerequisite.
