UCEAP Course Suffix
UCEAP Official Title SOCIOLOGY OF THE ENVIRONMENT
UCEAP Transcript Title SOCIOLOGY/ENVIRONMT
UCEAP Quarter Units 5.00
UCEAP Semester Units 3.30

Course Description

Students are introduced to environmental sociology with a focus on the interactions between human societies and the natural environment. By focusing on this two-way interaction, the course examines key theoretical perspectives, debates, and issues within environmental sociology. The course considers interdisciplinary perspectives examining a range of topics such as environmental inequality, sustainability, public attitudes towards climate change, renewable energy, consumption, pollution, environmental social movements, climate-induced migration, green crime and transformation to "green societies." These issues are examined at multiple levels, including rural and urban, local, and global, and from different perspectives of key stakeholders.
