6.00

UCEAP Semester Units

4.00

Course Description

In this course students develop an understanding of film, television, and digital media history. They look at how and where digital media intersect and converge with these moving image forms, examining media from the late 19th century through to the present. Students consider how even "old" technologies were "new" at some point, and analyze the relationship between technological, social, and aesthetic developments in new media forms.

Language(s) of Instruction
English
