3.00

Course Description

This course provides a comprehensive exploitation of analyzing and utilizing accounting information. It equips students with literacy in accounting information, fostering the development of strategic business decision-making skills and practices.

The course delves into the role of accounting information in business for students to gain a fundamental understanding of decision models and tools and engage in the study of various strategic decision-making cases. Classes will be conducted through a combination of lectures, discussions, and practical case analyses, facilitating students' in-depth understanding. By the end of this course, students are expected to have established a robust foundation in accounting principles and their practical applications in decision-making and control.

Prerequisite: Principles of Accounting (any basic accounting course)

Language(s) of Instruction
English
