3.00

Course Description

This course in public economics analyzes the design of taxes and transfers. The first part of the course introduces key concepts in public economics. The second part is dedicated to the analysis of particular policies covering the environment and climate change, unemployment insurance, redistribution, and capital and firms taxation. Course sessions include student presentations on actual policies in particular countries; for example, carbon taxes in Sweden, unemployment insurance in the United States, housing benefits in France, or corporate taxation in Germany.
