## Course Description

This course introduces the broad questions of development economics, such as why some countries are poorer than others and why some people in some countries are poorer than others. It covers a broad range of issues, including education, health, gender, and environment. The course discusses different markets and their imperfections; for example, credit, insurance, labor, and land markets. It also discusses important policy responses to poverty and their effectiveness; for example, micro-credit, social protection, environmental regulation, transportation infrastructure provision. Course prerequisites include microeconomics (covering utility maximization models and market equilibrium) and a course in statistics or econometrics (covering hypothesis testing and regression models).
