UCEAP Subject Area(s) Legal Studies
UCEAP Course Number 127
UCEAP Course Suffix S
UCEAP Official Title THE FOUNDATIONS OF AI LAW AND REGULATION
UCEAP Transcript Title AI LAW&REGULATIONS
UCEAP Quarter Units 5.50
UCEAP Semester Units

3.70

Course Description

The course considers how AI changes the legal landscape and how lawyers, and anyone interested in how our society is regulated, needs to adapt to this new landscape. It does so by examining how AI automates processes based upon data, a process known as datafication, and how data is used to train, and the algorithms at the heart of AI. It asks how this impacts our data privacy and whether data protection law is ready to deal with this new wave of personal data exploitation. From here it moves on to examine who controls the development and deployment of these algorithms, and how we might control their development and deployment in AI systems. It concludes by examining the current legal framework for AI regulation and asks how we should regulate AI and which approach is likely to be effective.
