**UCEAP Semester Units**

5.30

## Course Description

In this course, students are exposed to contemporary research on variation in a diverse range of languages, and are expected to engage with research covering some of the following topics: complex linguistic data from a range of languages (not solely English); diachronic processes of change and the social factors involved in them; patterns of synchronic, inter-dialectal variation in specific present-day languages; language-internal and language-external factors affecting variation; sound change and phonetic variation; patterns of variation and change affecting morphosyntax; and empirical methodologies including experimental research and statistical analysis techniques.

## Language(s) of Instruction

English
