Course Description

Neuroendocrinology is the discipline concerned with how the nervous system controls hormonal secretion and how hormones control the brain. It is pivotal in understanding both general physiology and medicine. This course provides up-to-date and research-orientated information delivered as a series of lectures and group exercises. The lectures are presented by experts in the particular area of research, and the group exercises are based on current research literature and/or results, and are designed to develop students' ability to read, understand, and appraise the current research literature.
