COURSE DETAIL

DATA ANALYTICS AND MACHINE LEARNING 4

Country
United Kingdom - Scotland

Host Institution
University of Edinburgh

Program(s)
University of Edinburgh

UCEAP Course Level
Upper Division

UCEAP Subject Area(s)
Electrical Engineering

UCEAP Course Number
172

UCEAP Course Suffix

UCEAP Official Title
DATA ANALYTICS AND MACHINE LEARNING 4

UCEAP Transcript Title
DATA ANALYTICS 4

UCEAP Quarter Units
4.00

UCEAP Semester Units
2.70

Course Description

The course provides engineering students with the skills to process and examine different forms of data in Python, and an understanding of how machine learning methods can use this data to solve classification and regression problems. Students learn how to implement these methods in Python using Scikit-learn. Students gain an awareness of when it is appropriate to use a particular method (if any), best practices, and the ethical issues that can occur when sourcing data and deploying machine learning in the real world.

Language(s) of Instruction
English

Host Institution Course Number
ELEE10031

Host Institution Course Title
DATA ANALYTICS AND MACHINE LEARNING 4
