N

UCEAP Official Title
TOPICS IN ADVANCED MICROECONOMICS

UCEAP Transcript Title
ADV MICROECONOMICS

UCEAP Quarter Units
6.00

UCEAP Semester Units

4.00

Course Description

This course explores the contributions made by economic theory to several important economic problems. While the list of topics is generally quite flexible, the underlying theme is the use of game theoretic modelling and the use of mathematical modelling and equilibrium concepts developed in economic theory. There are no formal prerequisites, but the course is quite technical and students with weak quantitative background should be willing to catch up with constrained optimization (e.g., Lagrange & Kuhn-Tucker methods) and intermediate microeconomics (e.g., competitive markets vs monopolies).

Language(s) of Instruction
English
