Course Description

Artificial intelligence is the technology that is commonly recognized to have profound impact to the economy and every aspect of human life. This course will focus on exploring how AI affects various aspects of the economy. We will focus on discussing the effects of AI on macroeconomics, labor market, education, as well as how AI combined with big data will transform business strategy, including issues such as individualized recommendation system, market design, data trading, etc. We will also discuss more fundamental ethnical issues such as privacy concern, algorithm discrimination, inequality and welfare. We will then have a better understanding of government policy regarding the AI technology.
