UCEAP Semester Units

4.00

Course Description

The course provides an introduction to the rapidly growing field of Geographical Information Systems (GIS) for social science students. Some of the most important theories and practices of GIS, within social sciences are presented. The course also addresses some key conceptual debates and developments in GIS. Practical tasks include exercises in a computer lab environment, and common analytical methods and tools within GIS are introduced. The course makes aware of the potential uses of GIS as well as its application within various fields of study.
