

# COURSE DETAIL

## TOPICAL RESEARCH METHODS FOR NATURAL AND ENVIRONMENTAL HAZARDS

**Country**

United Kingdom - England

**Host Institution**

King's College London

**Program(s)**

King's College London

**UCEAP Course Level**

Upper Division

**UCEAP Subject Area(s)**

Geography Environmental Studies

**UCEAP Course Number**

174

**UCEAP Course Suffix****UCEAP Official Title**

TOPICAL RESEARCH METHODS FOR NATURAL AND ENVIRONMENTAL HAZARDS

**UCEAP Transcript Title**

NATURAL&ENV HAZARDS

**UCEAP Quarter Units**

6.00

**UCEAP Semester Units**

4.00

**Course Description**

This is a highly interdisciplinary course about natural hazards and risk. This course is structured around a series of lectures and discussions aimed at understanding current methods for assessing, communicating, and visualizing risk and reducing disaster for hazards that are natural (e.g. earthquakes, volcanoes, tsunamis, mass wasting, floods, climate and extreme temperatures, multi-hazards) and environmental (e.g. heavy-metal contamination, chemical hazards), and the complex relationship that exists between these hazards and society. It is expected that students are already familiar with the material in the 2nd year Natural Hazards module (5SSG2042).

**Language(s) of Instruction**

English
