Psychology Linguistics Communication

**UCEAP Course Number**

133

**UCEAP Course Suffix**

N

**UCEAP Official Title**

REHABILITATION OF ACQUIRED NEUROGENIC COMMUNICATION  
DIFFICULTIES

**UCEAP Transcript Title**

NEUROGENC COMM DIFF

**UCEAP Quarter Units**

6.00

**UCEAP Semester Units**

4.00

**Course Description**

The course explores how frameworks, theories, and models from a number of different areas, including cognitive neuropsychology and psycholinguistics, inform clinical assessment and remediation of aphasia. Findings from basic science, neurophysiology, imaging, and speech and language therapy are linked to increase our knowledge of the effects of the rehabilitative interventions at the level of the brain as well as their functional impact. Both emerging and established rehabilitative approaches are highlighted.

**Language(s) of Instruction**

English
