# **COURSE DETAIL**

## **MATHEMATICS FOR MACHINE LEARNING (LEVEL 2)**

## **Country**

United Kingdom - England

#### **Host Institution**

University College London

## Program(s)

Summer at University College London

### **UCEAP Course Level**

**Upper Division** 

## **UCEAP Subject Area(s)**

Mathematics Computer Science

### **UCEAP Course Number**

112

### **UCEAP Course Suffix**

S

#### **UCEAP Official Title**

MATHEMATICS FOR MACHINE LEARNING (LEVEL 2)

## **UCEAP Transcript Title**

MATH/MACHINE LEARN

### **UCEAP Quarter Units**

6.00

### **UCEAP Semester Units**

### **Course Description**

This course offers students a grounding in the language of modern machine learning, with a focus on particular topics in linear algebra, differential calculus, probability, and statistics. Rather than focusing on theorems and their proofs, the course covers the key tools (and theorems) within the topic areas, and to illustrate these with exemplars drawn from machine learning. The course is delivered through a mixture of lectures and classes, and involves a mix of traditional lecture delivery, interactive notebooks, and problem sets.

## Language(s) of Instruction

English

#### **Host Institution Course Number**

**ISSU0129** 

#### **Host Institution Course Title**

MATHEMATICS FOR MACHINE LEARNING (LEVEL 2)

**Host Institution Campus** 

**Host Institution Faculty** 

**Host Institution Degree** 

### **Host Institution Department**
