UCEAP Quarter Units 6.00
UCEAP Semester Units

4.00

Course Description

Health and disease are shaped by social, cultural, political, and technological forces and inextricably linked with questions of science, technology, modernity, religion, colonialism, capitalism, racism, globalization, humanitarianism, and the state. This course focuses on recent developments towards the pharmaceuticalization of health, the molecularization of life, the commodification of the body, the privatization of medical care, and the securitization of public health. These developments have fundamentally transformed today's landscape of therapeutic governance in fundamental ways.
