UCEAP Semester Units

4.00

Course Description

This course introduces students to a structured approach to the clinical assessment of a patient, and develops skills important to becoming a doctor, and other allied health professionals involved in patient care. It guides students through a methodical approach to history taking, examinations and choosing and interpreting common investigations, as well as developing leadership and problem-solving skills. The ethical and legal frameworks governing medical practice is explored and allows students to understand its importance in their daily work. The course also focuses on understanding the principles of professionalism, patient safety, and effective communication - applying this to patients, relatives, and colleagues. The course features interactive teaching, practical skills group problem-solving, and simulated role play sessions.
