

# COURSE DETAIL

## APPLIED AI AND LAW

**Country**

United Kingdom - England

**Host Institution**

London School of Economics

**Program(s)**

Summer at London School of Economics

**UCEAP Course Level**

Upper Division

**UCEAP Subject Area(s)**

Legal Studies

**UCEAP Course Number**

134

**UCEAP Course Suffix**

S

**UCEAP Official Title**

Applied AI and Law

**UCEAP Transcript Title**

APPLIED AI & LAW

**UCEAP Quarter Units**

5.50

**UCEAP Semester Units**

**Course Description**

This course examines through three case studies how we should develop legal responses to the challenge of AI. Today AI is used by the police, other law enforcement agencies, and even by private citizens to build smart surveillance networks through the use of live facial recognition cameras and so-called “hot spot” policing. This has the potential to impact our privacy and personal data and risks bias and error in design and deployment. The use of AI in law enforcement is the first case study. The second, the deployment of AI in medical practice and treatment, raises questions of autonomy, consent, confidentiality, and liability. The third case study looks at how public authorities deploy AI in ways which impact all, including digital transformation of public administrative systems, the use of AI in the legal profession and the courts, and the deployment of AI at borders and to manage immigration.
