## **UCEAP Semester Units**

## **Course Description**

Students develop skills in data analysis, structuring decisions, building decision models, risk assessment, decision making under uncertainty, recognizing areas where business analysis can add value, selecting appropriate types of analyses and learn to apply them in a small scale, and quick-turnaround fashion. This is a practical course, which uses state-of-the-art decision support software to illustrate how to apply the methodologies introduced. Therefore, the course consists of a mixture of lectures and computer workshops. The software used in the lectures and workshops is Microsoft Excel, with add-ins @Risk for simulation, PrecisionTree for decision analysis, and Solver for optimization.
