**Course Description**

This course introduces students to the principles of health professions education and its application to practice. It guides students through learning about key theories in health professions education and they gain key skills needed to effectively teach in formal and informal environments. The course explores the use of feedback in teaching and learning and peer-assisted learning. It focuses on reviewing educational research and how this can inform clinical practice as well as explore the design and delivery of assessment. The course focuses on putting the knowledge and skills learned into practice through teaching peers, colleagues, patients, and future generations.
