6.00

UCEAP Semester Units

4.00

Course Description

This course is about the analysis of data within economics, and the interpretation of empirical results. The course provides an introduction to the application of economic theory to data; develops an understanding of simple and commonly used econometric techniques; imparts an ability to understand and interpret results both statistically and economically; and introduces students to widely used software in applied economics (STATA).

Language(s) of Instruction
English

Host Institution Course Number
