UCEAP Course Suffix
UCEAP Official Title ENVIRONMENTAL SOCIOLOGY: WARMING PLANET
UCEAP Transcript Title ENV SOCIOLOGY
UCEAP Quarter Units 6.00
UCEAP Semester Units 4.00

Course Description

This course examines the field of environmental sociology. In particular, it examines how societies build a sense of human/nature divide into their concepts of collective identity and how the struggle to responsibly utilize natural resources is a vexing social problem. It focuses on environmental social movements globally, analyzing how this growing site of social conflict interacts with other inequalities. It also explores the social transformations being enacted globally to build sustainability, improve human/animal coexistence, address environmental racism, and to think about climate change risk beyond the nation-state.
