TROPICAL FORESTS IN A CHANGING ENVIRONMENT

UCEAP Transcript Title

TROPICAL FORESTS

UCEAP Quarter Units

6.00

UCEAP Semester Units

4.00

Course Description

The course develops an awareness of the structure and function of tropical forest ecosystems and provides an intellectually stimulating understanding of the biophysical, ecological and anthropic processes which characterize these environments. To develop an awareness of the human impacts on these important systems and the kinds of geographical tools available for monitoring, modelling, and mitigation of the worst effects of these impacts.
