3.70

Course Description

Environmental, social, and governance (ESG) issues have attracted enormous attention from investors, regulators, and other stakeholders. This course introduces the concept of sustainability reporting and responsible investing. It evaluates the potential benefits of firms disclosing ESG information, as well as significant challenges to be overcome, including the risk of greenwashing. Students learn about existing and emerging ESG regulations and frameworks for ESG performance metrics. The course also explores how key capital market participants, such as asset managers, analysts, and banks, could incorporate ESG information into their investment decisions.
