ADV CORPORATE FIN

UCEAP Quarter Units
5.50

UCEAP Semester Units

3.70

Course Description

Exploring advanced theories used to understand financial markets in the context of corporate borrowing and lending, students discuss financing frictions that differentiate the functioning of perfect and imperfect capital markets. They then build on these theories to understand security design and the process of security issuance in equity markets. By applying the course material students evaluate corporate risk management and hedging, understand the role of corporate control, and the interaction of control rights and cash flow rights.
