**UCEAP Official Title**

INDUSTRIAL ORGANIZATION AND INTRODUCTION TO COMPETITION POLICY

**UCEAP Transcript Title**

INDUSTRIAL ORG

**UCEAP Quarter Units**

5.50

**UCEAP Semester Units**

3.70

**Course Description**

This course teaches students how to use economic analysis to study competition between firms and the evolution of market structure. The course also explores how this new generation of game-theoretic models has provided new ways of analyzing a range of practical issues and addressing some long-standing empirical questions. Topics covered include predatory pricing, cartel stability, the role of non-price competition, and the evolution of high technology industries. Theoretical models introduced in the lectures are applied in classes devoted to case studies of specific industries and to some antitrust court cases.

**Language(s) of Instruction**

English
