Course Description

This course introduces students to geographical scholarship that has sought to explain, understand, and critically analyze the manifold relationships between space and society in different contexts. The course familiarizes students with innovative geographical research exploring issues such as, for example, environment and uneven development; culture, the global, and the local; transnationalism and migration; gender, race, identity; politics, the state, and regions; empire, colonialism, and postcolonialism; nature, materiality, and non-human agencies.
