

## COURSE DETAIL

### ANIMAL BIOLOGY 2

**Country**

United Kingdom - Scotland

**Host Institution**

University of Edinburgh

**Program(s)**

University of Edinburgh

**UCEAP Course Level**

Upper Division

**UCEAP Subject Area(s)**

Biological Sciences

**UCEAP Course Number**

141

**UCEAP Course Suffix****UCEAP Official Title**

ANIMAL BIOLOGY 2

**UCEAP Transcript Title**

ANIMAL BIOLOGY 2

**UCEAP Quarter Units**

8.00

**UCEAP Semester Units**

5.30

## Course Description

The course starts with a look at the evolution of animal body plans and physiological systems through the radiations of animal life and leads on to a series of lectures on animal adaptations in marine environments. The course then looks at the evolution and diversification of vertebrate body plans, leading into a detailed study of the mammals. The course ends with a section on animal associations, including symbiosis and parasitism, and considers the adaptations associated with living in or on other animals.

### Language(s) of Instruction

English

### Host Institution Course Number

BILG08011

### Host Institution Course Title

ANIMAL BIOLOGY 2
